our experience your efficiency

Handled with care FTNON's advanced flotation washing lines for fresh salads, vegetables and herbs

NEW!

Our highly efficacious system of cleaning provides elevated quality to the point of consumption with prolonging freshness.

FTNON's innovative processes are specifically designed to ensure perfectly washed products:

- **Foreign material removal by fly-catchers with exchangeable screens to handle any and all products**
- **Efficient cost effective processing**

Even when the "used by date" is reached, the product is still beautifully fresh.

The salad looks shiny and attractive in a well-filled bag.

If you would like to know more about FTNON's product range for the fresh-cut industry, please contact:
